

LESSON PLAN: FRACTIONS

TOPIC: Understanding Fractions as Equal Parts of a Whole

LEARNING INTENTION

We are learning to recognise, name and represent fractions.

MATERIALS

- Fraction circles or fraction strips
- Whiteboards and markers
- Fraction worksheets
- Paper circles/squares
- Scissors
- Interactive whiteboard

SUCCESS CRITERIA

I can:

- Identify the numerator and denominator.
- Explain that fractions represent equal parts of a whole.
- Recognise and name common fractions ($\frac{1}{2}$, $\frac{1}{3}$, $\frac{1}{4}$, $\frac{1}{5}$, $\frac{1}{6}$, $\frac{1}{8}$).
- Create fraction models using drawings and materials.

$$\frac{1}{4}$$

Numerator
Denominator

LESSON SEQUENCE

10
mins

1. WARM-UP – PIZZA CHALLENGE

Display pictures of pizzas divided into different numbers of equal parts.

Discuss with students:

- If I eat 1 out of 2 equal pieces, what fraction is left?
- Which is larger: $\frac{1}{2}$ or $\frac{1}{4}$?
- How many quarters make a whole?

Students share their thinking with a partner, then as a class.

$$\frac{1}{2}$$

$$\frac{1}{4}$$

$$\frac{1}{3}$$

15
mins

2. EXPLICIT TEACHING

- Explain that a fraction shows equal parts of a whole.
- Introduce the terms numerator (top number) and denominator (bottom number).
- Use fraction circles/strips to model and name common fractions: $\frac{1}{2}$, $\frac{1}{3}$, $\frac{1}{4}$, $\frac{1}{5}$, $\frac{1}{6}$, $\frac{1}{8}$.
- Model writing fractions using numbers.

$$\frac{1}{2}$$

$$\frac{1}{3}$$

$$\frac{1}{4}$$

$$\frac{1}{5}$$

$$\frac{1}{6}$$

$$\frac{1}{8}$$

15
mins

3. GUIDED PRACTICE

- Students work in pairs.
- Use fraction strips or circles to represent given fractions.
- Fill in the missing fraction and colour the model.
- Check answers together as a class.

Represent and name the fractions.

$$\frac{1}{2}$$

$$\frac{1}{3}$$

$$\frac{1}{4}$$

$$\frac{1}{5}$$

15
mins

4. INDEPENDENT PRACTICE

- Students complete a worksheet.
- Tasks include: matching fractions to models, writing fractions, and identifying numerator and denominator.

A. Match the fraction to the model.

$$\frac{1}{2}$$

•

•

$$\frac{1}{4}$$

•

•

$$\frac{1}{3}$$

•

•

B. Write the fraction.

5
mins

5. REFLECTION

- What did you learn about fractions today?
- Which fraction do you find easiest? Why?
- Use a thumbs up/side/down to show your understanding.

I can do this!

I'm getting there.

I need more practice.

ASSESSMENT

- Observe during discussions and activities.
- Check guided and independent practice.
- Review worksheets to assess understanding of fractions.

DIFFERENTIATION

- Support: Use concrete materials and sentence starters.
- Extension: Challenge students to compare fractions and explain their reasoning.

Warm-Up: Pizza Challenge

$\frac{1}{2}$

If I eat 1
out of 2
equal pieces,
what fraction
is left?

Turn and talk to a partner.

$\frac{3}{4}$

Warm-Up: Pizza Challenge

Which is larger: $\frac{1}{2}$ or $\frac{1}{4}$?

Turn and talk to a partner.

Warm-Up: Pizza Challenge

How many
quarters
make a
whole?

Turn and talk to a partner.

Explicit Teaching: Parts of a Fraction

Numerator
= how many
parts are
shaded

3

Denominator
= how many
equal parts
in total

4

The **top number** tells how many parts we have.

The **bottom number** tells how many
equal parts make the whole.

Explicit Teaching: **Equal Parts**

Fractions show equal parts of a whole.

Equal parts

$$\frac{1}{4}$$

1 out of 4
equal parts

Not equal parts

Not a
fraction
model

$$\frac{1}{3}$$

1 out of 3
equal parts

Fractions = equal parts of a whole.

Explicit Teaching: Common Fractions

$$\frac{1}{2}$$

$$\frac{1}{3}$$

$$\frac{1}{4}$$

$$\frac{1}{5}$$

$$\frac{1}{6}$$

$$\frac{1}{8}$$

➤ The bigger the denominator, the smaller each part. ➤

Explicit Teaching: Writing Fractions

1

1 shaded part
out of 2
equal parts

$$\frac{1}{2}$$

2

1 shaded part
out of 3
equal parts

$$\frac{1}{3}$$

3

2 shaded parts
out of 4
equal parts

$$\frac{2}{4}$$

4

3 shaded parts
out of 5
equal parts

$$\frac{3}{5}$$

Write the shaded parts on **top** and
the total equal parts on the **bottom**.

Name: _____

Date: _____

Guided Practice Sheet 1

Colour the model and write the fraction.

1 Shade 1 out of 2 equal parts.

Fraction: _____

2 Shade 1 out of 3 equal parts.

Fraction: _____

3 Shade 2 out of 4 equal parts.

Fraction: _____

4 Shade 3 out of 5 equal parts.

Fraction: _____

5 Shade 1 out of 6 equal parts.

Fraction: _____

6 Shade 4 out of 8 equal parts.

Fraction: _____

Guided Practice: Represent and Name Fractions

Work with a partner.

1 Look at the model.

2 Count the equal parts.

3 Count the shaded parts.

4 Write the fraction.

$$\frac{1}{2}$$

$$\frac{1}{3}$$

$$\frac{2}{4}$$

$$\frac{1}{5}$$

Say: shaded parts **over** total equal parts.

Name: _____

Date: _____

Guided Practice Sheet 2

A Look at the model and write the fraction.

1

Fraction: _____

2

Fraction: _____

3

Fraction: _____

4

Fraction: _____

5

Fraction: _____

6

Fraction: _____

B Fill in the missing number.

1

$\frac{1}{\quad}$

2

$\frac{\quad}{5}$

3

$\frac{2}{\quad}$

4

$\frac{\quad}{8}$

Fraction Strips and Fraction Circles

Cut out and use these to show fractions.

1 Fraction Strips

whole

halves

thirds

quarters

fifths

sixths

eighths

2 Fraction Circles

whole

halves

thirds

quarters

fifths

sixths

eighths

Name: _____

Date: _____

Independent Practice: Fractions

A. Match the fraction to the model.

$$\frac{1}{2}$$

$$\frac{1}{3}$$

$$\frac{1}{4}$$

$$\frac{1}{5}$$

B. Write the fraction for each model.

C. Numerator or denominator?

1 In $\frac{3}{4}$, the numerator is _____.

2 In $\frac{3}{4}$, the denominator is _____.

3 In $\frac{2}{5}$, the numerator is _____.

4 In $\frac{2}{5}$, the denominator is _____.

D. Colour the model to show the fraction.

1 Shade 3 out of 6 equal parts.

Write the fraction:

2 Shade 5 out of 8 equal parts.

Write the fraction:

Remember: numerator = shaded parts, denominator = total equal parts.
