ADDITION (COLUMN STRATEGY)

The column strategy means adding numbers by placing them in the correct place value columns (ones, tens, hundreds, thousands) and then adding from right to left.

HOW TO ADD (COLUMN STRATEGY)

- 1 Write the numbers in columns, lining up the place values.
- 2 Add the ones (units) column. Regroup (carry) if needed.
- 3 Add the tens column. Regroup if needed. Continue with hundreds, thousands and so on.

EXAMPLE

Th	H	T	O
2	3	4	8
+	1	6	7
4	0	2	3

$8 + 5 = 13 \rightarrow \text{write 3, carry 1}$

$4 + 7 + 1 = 12 \rightarrow \text{write 2, carry 1}$

$3 + 6 + 1 = 10 \rightarrow \text{write 0, carry 1}$

$2 + 1 + 1 = 4$

So, $2\,348 + 1\,675 = \boxed{4\,023}$

A. Add the following numbers using the column strategy.

1

$$\begin{array}{r} 3\,4\,5 \\ + 2\,6\,7 \\ \hline \end{array}$$

.....

2

$$\begin{array}{r} 4\,7\,8 \\ + 1\,9\,6 \\ \hline \end{array}$$

.....

3

$$\begin{array}{r} 6\,3\,5 \\ + 2\,8\,9 \\ \hline \end{array}$$

.....

4

$$\begin{array}{r} 2\,5\,7\,8 \\ + 1\,3\,6\,9 \\ \hline \end{array}$$

.....

5

$$\begin{array}{r} 4\,8\,2\,7 \\ + 2\,3\,5\,6 \\ \hline \end{array}$$

.....

6

$$\begin{array}{r} 3\,6\,7\,9 \\ + 4\,5\,8 \\ \hline \end{array}$$

.....

7

$$\begin{array}{r} 5\,0\,6\,3 \\ + 2\,9\,7\,8 \\ \hline \end{array}$$

.....

8

$$\begin{array}{r} 7\,2\,8\,1 \\ + 1\,6\,9\,4 \\ \hline \end{array}$$

.....

B. Solve the word problems.

- 1 A school library has 2 345 story books.
It buys another 1 678 story books.
How many story books does it have in total?

- 2 Maya has 4 382 stickers.
Her friend gives her 2 517 more stickers.
How many stickers does Maya have now?

- 3 A farmer picks 3 284 apples in the morning
and 2 916 apples in the afternoon.
How many apples does he pick altogether?

Line up. Add up. Don't forget to carry!

SUBTRACTION (COLUMN STRATEGY)

The column strategy means subtracting numbers by placing them in the correct place value columns (ones, tens, hundreds, thousands) and subtracting from right to left.

HOW TO SUBTRACT (COLUMN STRATEGY)

- 1 Write the numbers in columns, lining up the place values.
- 2 Start from the ones (units) column. Subtract the bottom number from the top number.
- 3 If the top digit is smaller, regroup (borrow) from the next column on the left.
- 4 Continue with the tens, hundreds, thousands and so on.

EXAMPLE

Th	H	T	O
5	3	7	8
- 2	1	6	4
3	2	1	4

$8 - 4 = 4 \rightarrow \text{write } 4$

$7 - 6 = 1 \rightarrow \text{write } 1$

$3 - 1 = 2 \rightarrow \text{write } 2$

$5 - 2 = 3 \rightarrow \text{write } 3$

$$\text{So, } 5\,378 - 2\,164 = \boxed{3\,214}$$

A. Subtract the following numbers using the column strategy.

$$\begin{array}{r} 4\,578 \\ - 2\,365 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 6\,832 \\ - 1\,478 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 7\,096 \\ - 2\,567 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 9\,241 \\ - 3\,562 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 5\,607 \\ - 2\,748 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 8\,035 \\ - 4\,619 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 7\,250 \\ - 3\,863 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 6\,413 \\ - 1\,975 \\ \hline \end{array}$$

.....

B. Solve the word problems.

- 1 A library has 8 752 books.
If 3 468 books are borrowed,
how many books are left in the library?

- 2 A factory produced 9 620 toys.
If 4 735 toys were sold,
how many toys are left?

- 3 A school had 7 845 pencils.
If 2 958 pencils were given to students,
how many pencils are left?

- 4 There are 6 307 tickets for a concert,
